

**Invitation for
EDISON
demonstration and workshop
on 18 August 2010
at Risø DTU in Roskilde**

In the EDISON project Danish and international competences will be utilised to develop optimal system solutions for EV system integration, including network issues, market solutions, and optimal interaction between different energy technologies. The workshop gives an overview of the project and shows some midterm results.

9.00 Registration

9.30 Welcome

Speakers:

- Why does the power system need EV's? /*Kim Behnke, Energinet.dk*
- Peugeot perspective on E-mobility /*Jens Andersen, Peugeot*
- An overview of the EDISON project /*Jørgen S. Christensen, Dansk Energi*
- Important midterm results
 - The EDISON picture on EV charging /*Lars Henrik Hansen, Dong Energy*
 - The need for EV standardisation /*Claus A. Andersen, Eurisco*

12.30 Lunch

Demonstrations/workshops:

- Fleet operation for mutual benefits
- The user is important
- The fast charging option
- The power balancing option

15.30 Closing

The 4 demonstrations/workshops run in parallel and they will be repeated every 20 minutes.

Venue: Frederiksborgvej 399, 4000 Roskilde.

Please register your participation to this workshop by sending an email to sls@danskenergi.dk on 7th of August at the latest.
